Notes to the Financial Statements

Six months ended August 31, 2016 and 2015

(Unaudited, in Canadian Dollars)

1. NATURE OF OPERATIONS, BASIS OF PRESENTATION AND GOING CONCERN

Sphinx Resources Ltd. (the "Corporation") was incorporated on June 28, 2005 and is governed by the *Canada Business Corporations Act*. The Corporation's shares are listed on the TSX Venture Exchange ("Exchange") under the trading symbol "SFX". The Corporation operates in one industry segment, being the acquisition, exploration and development of mineral properties. The Corporation's head office is situated at 1000, De La Gauchetière West, Suite 2100, Montreal, Quebec, H3B 4W5.

The measurement of certain assets and liabilities is dependent on future events, therefore the preparation of these unaudited condensed interim financial statements ("Financial Statements") requires the use of estimates, which may vary from actual results. The success of the Corporation's exploration and evaluation activities is influenced by significant financial risks, legal and political risks, commodity prices, and the ability of the Corporation to discover economically recoverable reserves.

1.1 Basis of presentation

These Financial Statements have been prepared in accordance International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34, Interim Financial Reporting. The Financial Statements should be read in conjunction with the annual financial statements for the year ended February 29, 2016, which have been prepared in accordance with IFRS as issued by the IASB. The accounting policies, methods of computation and presentation applied in these Financial Statements are consistent with those of the previous financial year.

The Financial Statements of the Corporation for the six months ended August 31, 2016 were reviewed, approved and authorized for issue by the Board of Directors on October 6, 2016.

1.2 Going concern

The Financial Statements have been prepared using IFRS applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. In assessing whether the going concern assumption is appropriate, Management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. Management is aware in making its assessment of material uncertainties related to events and conditions that lend a significant doubt upon the Corporation's ability to continue as a going concern and accordingly, the appropriateness of the use of IFRS applicable to a going concern, as described in the following paragraph. These Financial Statements do not reflect the adjustment to the carrying values of assets and liabilities, expenses and financial position classifications that would be necessary if the going concern assumption would not be appropriate. These adjustments could be material.

The Corporation recorded a loss of \$631,437 for the six months ended August 31, 2016, and has an accumulated deficit of \$70,028,073 as at August 31, 2016. In addition to ongoing working capital requirements, the Corporation must secure sufficient funding to meet its other obligations, existing commitments for the exploration and evaluation programs and pay general and administration costs. As at August 31, 2016, the Corporation had a negative working capital of \$299,346 (positive of \$232,482 as at February 29, 2016), which includes a \$384,674 (\$328,377 as at February 29, 2016) convertible debenture maturing on December 19, 2016. These conditions indicate the existence of material uncertainty that may cast a significant doubt regarding the Corporation's ability to continue as a going concern.

The Corporation's ability to continue as a going concern is dependent upon its ability to raise additional financing to further explore its mineral properties. While Management has secured financing in the past, there can be no assurance it will be able to do so in the future or that these sources of funding or initiatives will be available for the Corporation or that they will be available on terms which are acceptable to the Corporation. If Management is unable to obtain new funding, the Corporation may be unable to continue its operations, and amounts realized for assets might be less than amounts reflected in these financial statements and this could have a significant impact on the financial position of the Corporation, its financial performance and its cash flows.

10. FINANCE COSTS (CONT'D)

Sphinx had entered into an agreement with Eco-Niobium providing for a strategic investment in Eco-Niobium of up to \$250,000 by way of a non-brokered private placement of unsecured convertible debentures of Eco-Niobium. The TSX-V had conditionally approved the investment. One of the conditions that had to be satisfied was the approval by the shareholders of Corporation, excluding the votes of non-arms' length parties. The investment is a non-arms' length transaction under the policies of the Exchange as a result of three directors being also directors of Eco-Niobium, namely Normand Champigny, Kerry E. Sparkes and John W. W. Hick. The Corporation decided not to seek the disinterested shareholder approval at its October 6, 2016 shareholder meeting to complete the strategic investment in Eco-Niobium by way of a non-brokered private placement of unsecured convertible debentures of Eco-Niobium. Considering the current status of this project and the various approvals that Eco-Niobium has to achieve to successfully move this project forward, including obtaining the legal mineral rights, management has provided for 100% of the promissory note.
